

Timothy Smith, Ph.D.

Research Scientist

 [timothyas](#)

 [timothyas.github.io](#)

RESEARCH INTERESTS

Machine Learning	Uncertainty Quantification	Probabilistic Forecasting
Coupled Data Assimilation	Ocean Modeling	Open Source Software Development
Cloud Computing	Observing System Design	Ice-Ocean Interactions

EDUCATION

Ph.D. in Computational Science, Engineering, and Mathematics; December 2021

The University of Texas at Austin

Thesis: *Uncertainty Quantification of Ocean Driven Melting Under the Pine Island Ice Shelf*

Overall GPA: 3.96/4.00

M.S. in Computational Science, Engineering, and Mathematics; May 2017

The University of Texas at Austin

Overall GPA: 3.96/4.00

B.S. in Mechanical Engineering with High Honors; May 2014

Certificate in Scientific Computation

Thesis: *Modeling Coupled Photovoltaic Power Plants with Compressed Air Energy Storage in Texas*

The University of Texas at Austin

Overall GPA: 3.91/4.00

RESEARCH EXPERIENCE

Researcher, May 2026 - Present

The Nansen Environmental and Remote Sensing Center

Research Physical Scientist, February 2024 - March 2026

NOAA Physical Sciences Laboratory (PSL), Earth System Research Laboratories (ESRL)

Developed multi-resolution global ML weather emulator, with 6km resolution over the U.S.

Led development of ML preprocessing, training, and evaluation infrastructure at PSL

Publicized [NOAA's UFS Replay](#) dataset in Zarr on Google Cloud Storage (~ 1 Pb)

Publicized the [CONUS404](#) dataset in Zarr on Microsoft's Planetary Computer (~ 2 Pb)

Research Scientist, December 2020 - February 2024

Cooperative Institute for Research in Environmental Sciences (CIRES), CU Boulder

Physical Sciences Laboratory (PSL), NOAA Earth System Research Laboratories (ESRL)

Integrated recurrent neural network emulators with data assimilation techniques

Developed framework for emulating large scale geophysical turbulence with echo state networks

Developed prototype machine learning model targeting strongly coupled data assimilation

Graduate Research Assistant, August 2015 - December 2021

Oden Institute for Computational Engineering and Sciences; The University of Texas at Austin

Advisor: Dr. Patrick Heimbach

Developed computational framework for oceanographic uncertainty quantification

Evaluated ice shelf melt rate uncertainty reduction from sparse, in situ ocean observations

Developed and implemented anisotropic, nonstationary prior covariance model

Undergraduate Research Assistant, December 2011 - May 2014
Department of Mechanical Engineering; The University of Texas at Austin
Advisor: Dr. Mark Deinert

Developed Monte Carlo neutron transport model to better parameterize nuclear reaction rates

Implemented Monte Carlo radiation transport model in C for parameterization validation

Explored the potential solar energy cost reduction via positive feedback from economies of scale

Undergraduate Research Assistant, Summer 2013
Oden Institute for Computational Engineering and Sciences; The University of Texas at Austin
Advisor: Dr. Michael Sacks

Developed tetrahedral human heart model for mechanical deformation simulations

Established workflow for collaboration with Medtronic (industry partners)

AWARDED GRANTS AND FUNDING

- J. Estep (PI), **Smith, T.A. (PI)**. *Cloud Data Analytics Medium Range Weather Project*. Subgrant through West Virginia High Tech Foundation (HTF-22OAR-01-20230124), from prime award NOAA Community Project (NA22OAR4690670). \$212,494. March 2023-September 2024.
- **Smith, T.A. (PI)**. *Ensemble Weather Generators for Data Assimilation and Forecasting at NOAA*. [NERSC Generative AI HPC for Science Program](#). AY 2024. July - Dec 2024 (with annually renewing support to present).

SELECTED PRESENTATIONS

ORAL PRESENTATIONS

1. *Transforming NOAA Data to Analysis Ready Format in the Cloud for ML*. NOAA's 7th AI Workshop Series - Generative AI. Virtual. March 3, 2025.
2. *Recurrent Neural Network Emulation for High Resolution Forecasting*. ECMWF-ESA Workshop on Machine Learning for Earth Observation and Prediction. Reading, UK. November 21-24, 2022.
3. *Quantifying uncertainties in ocean driven melting under the Pine Island ice shelf*. SIAM Conference on Mathematical and Computational Issues in the Geosciences. Virtual Conference. June 21-24, 2021.
4. *ecco_v4_py demo: analysis tools for the ECCO state estimate in python with xarray and dask*. ECCO Townhall, Ocean Sciences Meeting 2020. San Diego, California. February, 2020.
5. *Atmospheric origins of variability in the South Atlantic meridional overturning circulation*. Workshop on Sensitivity Analysis and Data Assimilation in Meteorology and Oceanography. Aveiro, Portugal. July, 2018.

POSTER PRESENTATIONS

1. *Recurrent Neural Network Emulation of Turbulent Geophysical Fluids*. AGU Fall Meeting 2022. Chicago, IL. December, 2022.
2. *Uncertainty Quantification of Ocean Driven Melting Under the Pine Island Ice Shelf, West Antarctica*. Invited Poster at Ocean Sciences Meeting. February - March, 2022. See it [here](#).
3. *Informing bathymetry through an ocean model*. Workshop on UQ for inverse problems in complex systems. Cambridge, UK. April, 2018.
4. *A dynamical reconstruction of AMOC variability at the mouth of the South Atlantic*. SIAM Conference on Mathematical and Computational Issues in the Geosciences. Erlangen, Germany. September, 2017.

SOFTWARE CONTRIBUTIONS AND COMPUTATIONAL SKILLS

I AM A CORE DEVELOPER OF...

- **ufs2arco**: prepare NOAA forecast and reanalysis datasets for analysis, Machine Learning workflows, and/or cloud deployment (Python)
- **xesn**: design Echo State Networks for large-scale forecasting tasks in using **xarray**, **dask**, **CuPy** on GPUs, and **NumPy** on CPUs (Python)
- **ecco_v4_py**: analyze ECCOv4 ocean state estimate output with **xarray**, **dask**, **xgcm**, & **xmitgcm** (Python)
- **sparc**: educational tool for solving the sparse page rank problem in on multicore (KNL) architecture (C++)

I AM A CONTRIBUTOR TO...

- **MITgcm**: general circulation model for a variety of oceanographic applications (Fortran)
- **xgcm**: analyze and postprocess general circulation model output (Python)
- **xmitgcm**: read MITgcm binary output to **xarray** (Python)

COMPUTATIONAL SKILLS

Python, with experience using

JAX, **PyTorch**, and **CuPy** for Machine Learning and GPU acceleration

Dask and **mpi4py** for parallel computing

seaborn and **matplotlib** for visualization

xarray and **Zarr** for data processing and storage

Fortran & C/C++ with experience using MPI and OpenMP

Git/Github

HONORS AND AWARDS

- **Certificate of Recognition**, UT Austin SIAM Student Chapter. 2018.
- **Poster Presentation Award**, SIAM Conference for Mathematical and Computational Issues in the Geosciences. September, 2017
- **Professional Development Award for Travel**, UT Office of Graduate Studies. Fall, 2017.
- **CSEM Fellowship**, Oden Institute, UT Austin. 2014 - 2018
- **Graham F. Carey Undergraduate Scholarship in Computational Science**, Oden Institute, UT Austin. 2014
- **Fuel Cycle Research Award**, US DOE Office of Fuel Cycle Technologies. 2013
- **Nuclear Energy University Program Scholarship**, US DOE Integrated University Program. 2012
- **Undergraduate Research Fellowship**, UT Austin, 2012

TEACHING EXPERIENCE, SERVICE, AND LEADERSHIP ROLES

TEACHING

- **Computing Mentor**, [Significant Opportunities in Atmospheric Research and Science \(SOARS\)](#). May - July, 2022.
Assisting protégé with computing needs, mostly establishing a consistent and efficient, python-based workflow for analyzing atmospheric data and model output.
- **Instructor and Co-Organizer**, [ECCO Summer School](#). May, 2019.
Presented [Jupyter notebook tutorials](#), demonstrating [ECCO state estimate](#) analysis in python
Taught students to use Git and GitHub
Organized computational resources for remote analysis via the [Texas Advanced Computing Center](#)
- **Mentor**, for Andrew Xiao (undergraduate), UT Austin. Spring, 2019.
Mentored undergraduate student during his final thesis project, titled:
Comparing Volumetric Transport from the Arctic with Estimated Transport using ECCO and ASTE
- **Teaching Assistant**, Descriptive Physical Oceanography, UT Austin. Spring, 2019.
Presented lecture and provided course notes on air-sea interactions at undergraduate & graduate level
- **K-12 Outreach Tutor & Committee Chair**, Tau Beta Pi Engineering Honor Society. 2013-2014.
Tutored students in high school mathematics
Organized supplemental Saturday tutoring sessions
- **Undergraduate Tutor**, Mechanical Engineering, UT Austin. 2011-2012.
Tutored undergraduate level thermodynamics, fluid mechanics, dynamics, & computational methods

PROFESSIONAL SERVICE AND LEADERSHIP

- **Reviewer**: Artificial Intelligence for the Earth Systems, Frontiers in Oceanography, Journal of Advances in Modeling Earth Systems, Journal of Climate, Journal of Geophysical Research: Oceans, Journal of Open Source Software, Ocean Science, Quarterly Journal of the Royal Meteorological Society.
- **Co-Organizer**, [Texas Applied Mathematics and Engineering Symposium](#). September, 2017.
Helped organize and run a 3 day, student led conference, initiated by the UT Austin Chapter of SIAM

- **Industry Liaison**, UT Austin Chapter of SIAM. 2016-2018.

Invited speakers from industry and national laboratories to give talks aimed at graduate students

Organized one-on-one meetings between representatives and students

OUTREACH AND VOLUNTEERING

- **Zero Waste Volunteer**, Oden Institute, UT Austin. January 2020 - January 2021.

Co-leading institute initiative to curtail landfill waste, implement composting, and reduce carbon footprint

- **Volunteer, UT Girl Day**. February, 2020.

Organized and demonstrated Arctic-Ocean themed scientific experiments for girls in grades K-12

COURSEWORK AND SUMMER SCHOOLS

SELECTED GRADUATE COURSEWORK

Mathematics: Variational Methods for Inverse Problems, Functional Analysis, Multiscale Modeling, Statistical Estimation Theory

Computational Science: Parallel Algorithms, Validation and Uncertainty Quantification in Computational Models, Numerical Methods for Differential Equations

Fluid Mechanics & Oceanography: Dynamics of Turbulent Flows, Fluid Dynamics of the Atmosphere and Ocean, Computational Ocean Modeling, Observational Physical Oceanography

SUMMER SCHOOLS

[Advanced Climate Dynamics Course](#), September 2018

[Global Ocean Data Assimilation Experiment \(GODAE\) Ocean View International School](#), October 2017

[Statistical and Applied Mathematical Sciences Institute \(SAMSI\) Optimization Summer School](#), August 2016
